PROCESS

Parcel Sortation on Logistics sites

Situation

Many hours spent on belts maintenance and replacement.

Parcel Sortation facilities have many short belts installed in awkward places where it is often really tricky and dangerous to bring splicing tools. Furthermore, it is often required to disassemble half the conveyor to conduct the installation...

Solution

ZipLink® belts allow the replacement to be done in minutes,

and the high-quality top covers extends lifetime of the belts simplifying maintenance. This innovative belt family is designed to offer benefits in many applications within the Parcel Sortation Industry: gapping, live roller, strip merge, general and incline transport, high speed merging.

Benefit & Advantages

- **Increased production time:** only a few minutes for belts change
- **Less downtime, more productivity!**
- Easy-to install: fewer people needed for installation with only basic training, without special tools
- Reduced maintenance costs
- Less in-house stock
- Impact and wear resistant
- Seamless joint, better product safety
- Fewer safety issues due to the absence of hot splice and heavy equipment.
