

CLIPPER® Mobile Splicing Center

Efficient and Portable: the Clipper® Mobile Splicing Center for Clipper® Wire Hook Belt Installation

Bring the ability to splice right at the conveyor with the Flexco Clipper® Mobile Splicing Center. Our latest innovation provides mobility of all splicing tools and components required for Clipper® wire hook installation. The Clipper® Mobile Splicing Center eliminates the time wasting hassle of making multiple trips to your maintenance crib or spending precious time gathering up the tools and splicing components, making quick and efficient belt repairs possible in one fell swoop. The Clipper® Roller Lacer® Gold Class™, Clipper® Belt Cutter, Laser Belt Square, and Smart Clamp™ have dedicated locations that are clearly identified. The Clipper® Mobile Splicing Center also stores required accessories, come-alongs, face strips and lacer pins, belt fasteners, Pin Paks™, and other hand tools that are needed to complete a splice on-site.

Locking clamps: Secures Clipper® Belt Cutter and Roller Lacer® in place.

Tool storage: Extra compartments to provide equipment with protection from extensive damage.

Foot brake: Keeps the Mobile Splicing Center sturdily in place.

Comprehensive design: Specific compartments for Clipper® tools and components that create an organized work center.

Features and Benefits:

- **Improved efficiency:** Each tool and component necessary to install Clipper® wire hooks has its own separate, identified space, allowing workers to swiftly perform belt splices, while keeping equipment in top-shape for consistent, quality performance.
- **Optimized productivity:** In order to minimize extra trips and decrease downtime, a fully loaded Clipper® Mobile Splicing Center can quickly and easily be rolled directly to a conveyor.
- **Increased safety:** The Clipper® Mobile Splicing Center comes with several compartments to keep your workspace organized, creating room to perform repairs and belt fabrication safely and efficiently.
- **Highly mobile:** Equipped with swivel wheels on the push/pull handle end, the Clipper® Mobile Splicing Center is designed for ease of transport.
- **Latest Equipment:** Cart is equipped with the newest Flexco Clipper tools, ensuring the highest standard of belt splice possible.

*Mobile Splicing Center can be ordered loaded with all equipment required to complete a Clipper wire hook splice or empty to provide organized mobility to the Clipper splicing equipment you already have.
