

RADIAL BELT EDGE PROTECTOR

Protect Your Power Turns

Conveyor power turns create an incredibly expensive jam point for your facility. As packages, luggage, and debris navigate from straight to curved belt, they naturally drift outward and wedge between the belt and the conveyor structure or drive mechanism, halting operations and damaging belts that can cost you significantly more to repair and replace than straight belt sections.

The Radial Belt Edge Protector (BEP-R) delivers the industry's first real defense. Purpose-built for curved conveyor applications, it features a vertical brush barrier that blocks package intrusion while allowing your belt to glide freely underneath. Simple to install along any power turn, the BEP-R provides immediate protection where your facility needs it most. Stop jams and hit delivery deadlines with Flexco's Radial Belt Edge Protector.

Lead In attaches to BEP-R via link plate and prevents catch point

BEP-R segments attach via link plate for seamless transition

Features and Benefits:

- **Unique Design** – First solution that has been engineered specifically for power turn applications
- **Vertical Brush Barrier** – Encapsulated bristles physically prevent packages from becoming stuck while permitting unobstructed belt movement
- **Protective Infrastructure** – Safeguards the curved belt systems that represent high conveyor investment and replacement costs
- **Quick Attachment** – Mounts directly to conveyor structure using straightforward, rapid installation methods
- **Proven Quality** – Built within the trusted Belt Edge Protector platform with durable construction for high-volume environments
- **Adaptable** – String together multiple pieces or cut to length to match any size power turn

Radial Belt Edge Protector Ordering Information

| Description | Ordering Number | Item Code |
|--------------------------|-------------------|-----------|
| BEP-R 10ft Kit | BEP-R-10U | 130010 |
| BEP-R 20ft Kit | BEP-R-20U | 130020 |
| Replacement Parts | | |
| BEP-R 10ft Hardware Kit | BEP-R-HDWKIT-10FT | 130002 |
| BEP-R 20ft Hardware Kit | BEP-R-HDWKIT-20FT | 130003 |
| BEP-R Install Kit | BEP-R-INSTALL | 130004 |
| BEP-R Lead In Kit | BEP-R-LEAD-KIT | 130007 |
| Replacement Link Plate | BEP-LP | 108331 |

NOTE: BEP-R Install Kit contains a wrench, cobalt drill bit, and hex bit.
