

Smart Operators Use Intelligent Splicing

Upgrade Your Novitool® Aero® to an Aero® with IntelliSplice™ with a Retrofit Package

The Novitool® Aero® Retrofit Package enables your operation to recoup uptime. By replacing the top beam head plate with interface and e-tray on your existing press, you get all the capabilities of the new Novitool® Aero® Splice Press with IntelliSplice™ Technology without the cost of a brand new press. That means BLE & Wi-Fi connectivity for updates and diagnostics, a touchscreen display and D-pad controller for faster input, full access to the Aero® Mobile App for managing splice recipes on the go, and a restart of a one-year warranty on your upgraded press.

HOW TO IDENTIFY YOUR AERO MODEL

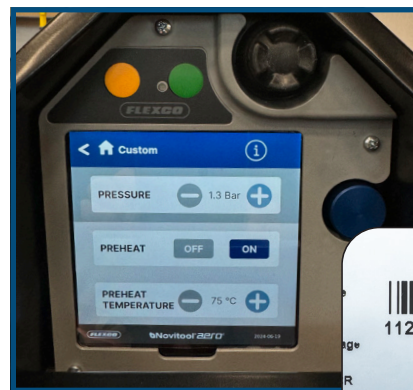

Look at the display screen to determine which Aero model you have (see photos). Review the serial number label on the opposite end of the press from the display screen. Serial number starts with an 'E'. If the next digit is a '3' it is eligible for the Retrofit Package.

WHY RETROFIT?

- Go Digital: Touchscreen display, BLE and Wi-Fi connectivity, and the Aero Mobile App put recipe management and diagnostics right at your fingertips.
- Effortless Recipe Entry: Add, edit, delete, and sync recipes between your press and smart device through the Aero Mobile App via built-in BLE connectivity.
- Wi-Fi Capability: Keeps your press current with the latest firmware updates for Aero press enhancements.
- Save vs. Buying New: Get IntelliSplice™ performance at a fraction of the cost of a new press.
- New Warranty: Retrofit restarts a one-year warranty on your upgraded press.
