

LIVE ROLLER BELTS

New Technology Improves Belt Life.

Live Roller conveyors are key to the efficient operation of a DC. Long runs require a dependable belt to drive the rollers and move packages at ever increasing speeds. Many belts that run on rollers experience fraying and can lead to breaking.

MIR's line of extruded polyurethane belts have been proven to outperform OEM options on Honeywell Intelligated, TGW, and other systems.

Benefits of MIR's extruded polyurethane belts:

- No edge fraying
- Consistently stronger splice
- Integral v-guide eliminates delamination
