

MDR BELTS

Abrasion Resistance. Performance Improving.

Motorized Driven Rollers (MDR) belts are utilized in distribution centers to minimize product gaps and maximize throughput. Precise product orientation and speed are required to ensure that the sortation process runs smoothly. Gapping, Metering, Merging sections all use endless elastic belts that take abuse daily while handling packages.

MIR can survey your equipment and provide belts for all systems, including Dematic, Honeywell Intelligated and TGW.

Benefits of MIR's MDR Belts:

- Abrasion resistant urethane for long service life
- Increased tear resistance
- Bi-directional capabilities

Contact your MIR Continuous Improvement Specialist for specific application questions and to receive a quotation.
