

# MODULAR RADIUS BELTING

Robust Construction. Tight Radius Capable.

## SOLUTION SPOTLIGHT:

Robust design that smoothly transfers products between conveying surfaces – minimizing stress & fatigue.

## Advantages:

- Sideflex belts with inside turn radius as low as  $1.6 * \text{belt width}$
- Potentially reduce floor space, especially compared to multiple straight running conveyors
- Wear resistant polyamide (nylon) sprocket and pin material
- Lockpin system for easy installation and removal
- Nosebar capable for tighter transfer of small products
- Robust hinge design for heavier loads and longer belt life
- Outer link edge designed to better distribute tensile load across more hinges
